Local Cowboy Is Spectacular

Pete Knight, noted Crossfield cowpuncher, was proclaimed bucking champion of the world on Saturday, but two Western United States riders shared the title of the King of 1936 Pendleton round-up

CARD OF THANKS

Mr. O. E. Jones and family, wish to thank all their friends and neighbors, for the kindness and sympathy received during their recent bereavement, and also for the beautiful floral offerings.

After delivering the shipment at Perth, Bill visited with his parents at Callander, then journeyed north to Inverness, Aberdeen, Elgin, Huntly, Keith and Turriff. At the latter point he ran across Jamie Watson (who left here in 35) and they exchanged news. James is doing well and becoming used to his native heath, and intends settling when he can locate a farm to his liking. He sends greetings to his friends here. Everyone in Scotland looks prosperous, well dressed and well fed, and not once was Bill ever touched for the price of a meal. Cattle are bringing good prices, and farm crops were very promising.

Annual School Fair Prizewinners for 1936

By "Seedling"

Another school fair has come and gone. Although the total of entries were not as large as in some previous years, this time we had 920 entries. The quality was certainly very high. The chief cause of the lower number was the new rule from the Department of Education allowing only two entries in any class of school work from each school. This rule undoubtedly caused great dissatisfaction amongst pupils and teachers alike and will have to be taken out before another fair comes round.

(continued on page six)

Crossfield Amateur Night. What Talent Abounds, Can It Be Put Over?

It has been mooted in several places that an Amateur night be held in Crossfield. So as to give an idea just who would partake, an entry coupon will be found elsewhere in these pages. If you are interested, fill out the coupon and mail it immediately, so that a decision may be reached at an early date.

Cash prizes will be awarded to the winners.

To decide the winning entries an applause meter will be installed, and thus the audience will, by their stimulation of the various acts, determine the winner.

Acts should be confined to 3 or 4 minutes, and in no case to exceed five.

Come on you budding entertainers, let's see what you can do. To make it doubly interesting, the Bannister Electric will install a public address system, and your voice will go on the air over the crystal miles of station BEC, Crossfield. It's the chance of a lifetime, so get your entries in right away, as the number received will be the determining factor as to whether or not Crossfield will have an amateur Radio Night a la Major Bowes.

Support of this idea means the C.D.S. will take over the management of the programme and ensure the contestants that it is on the up and up.

The New Speed Train

The new streamline train of the Canadian Pacific Railway will make an exhibition and trial run on this line September 23rd. A special excursion at one cent per mile will be given on the 25th, between Calgary and Edmonton.

We are given to understand that the train will not enter the service proper until Sunday September 27, and the initial run will commence from Edmonton on that date.

The new train will be called "The Chinook" and is the very latest in up-to-date travel comfort. Comprising Jubilee 4-4-4 type locomotive (3000 class) mail and express car, baggage and buffet car and two first class coaches, it marks a distinct forward movement in modern transportation in Canada. Thoroughly air-conditioned, the cars at all times are supplied with clean, fresh air and will be found warm in winter, and pleasantly cool in summer.

In the pictures shown elsewhere, a full idea of the train can be conceived.

This part of Alberta is fortunate indeed, in being chosen for the scene of operations of the new class of train, and it is anticipated that railway travel will be stimulated by it.

K. C. Allen Appointed General Manager

Announcement was made Friday last by Mr. H. E. Sellers, President of the Alberta Pacific Grain Co., Ltd., that K. C. Allen had been appointed General Manager of the Company to succeed J. R. Murray, who formerly occupied that post, and is now Chief Commissioner of the Canadian Wheat Board. Mr. Allen was formerly Western Manager of the Company. His headquarters will remain at Calgary. Mr. Allen is well known in grain circles in Winnipeg and Vancouver as well as throughout Alberta.

New Ideas in Business

A new small washboard of sponge rubber is made for the women who wash their own lingerie or other delicate fabrics. This aid helps do the job quickly and well.

A new inner window is said to be neater than storm windows. It saves cost on heating or air conditioning, is easily put on or removed, and may be removed, and may be opened to provide indirect ventilation.

Crossfield Phone 34

The Enquiring Reporter Says:

The following are the teachers at the rural schools getting mail at Crossfield:

Elba, Rodney	Miss F. Gough
Stanley, Stanley	Miss Laing
O'Neill, Miss Marion Ingham	Miss Margaret Murdoch
Inverla, Miss M. Edmundson	Greenwood, Miss A. Abell
Tany Bryn, Wayne Stauffer	Meadowside, Miss L. Michel
Floral, Ken. McCrae	

Before A. S. Gough, J. P., Carstairs, Daniel Doherty, of Crossfield, was fined \$5 and costs, or thirty days, on Wednesday, September 2, for failing to destroy Noxious Weeds on his property. Constable Cameron, R.C.M.P., of Crossfield, prosecuted. The complaint was laid by Weeds Inspector H. J. Stuckey, of the Municipal District of Beaver Dam, No. 281.

The Baptist Church Congregation have started preparations for the erection of a new Parsonage on the church grounds. John Reichenbecker is in charge of operations.

J. T. Davis, local agent of the U.G.G. elevator here, has purchased the present parsonage on Hammond Street.

Today's Thought

Unless you bear with the faults
of a friend, you betray your own.
—Syrus.

Courage

Physical courage, which despises
all danger, will make a man brave
in one way; and Moral Courage,
which despises all opinion, will
make a man brave in another. The
former would seem most necessary
for the camp, the latter for coun-
cill; but to constitute a great man,
both are necessary.

GOSSIP AND GRUMBLES

George Lim says despite who
wins the National Pennant, he is
hook, line, and sinker for the Yanks
to win the World Series. Count-
ing on the machine is getting Geo.
Joe Stamp in agony, tearing
cheques. Believe it or not, by Rips.
The Chronicle Staff, including
the Editor, unthinkingly working
overtime, the office clock was mis-
sing. A thief of time.

A Barber, Printer and a P.D.,
gone pap-rhanging. Paste waste.
The Auditors lone gray hair gone
white. Poor chap.

Jean Stevens depending on the
Editors pencil at the C.D.S. meet-
ing. He didn't have one, so Jean
used her own.

The Chief Composer growing
taller—he has had several inches
added to his boot heels.

The Chronicle Trolley delivering
school supplies. A rattling good
delivery too.

Bert Baunister doing Sandow
exercises with the phone equipment.
Bert won.

Norman Johnson and Everett
Bills, Crossfield's lone pair pulling
for the Giants. Will there be a
Jack the Giant Killer this year?

The E.I. was always fond of the
story of the three bears. Probably
that explains his pulling for the
Cubs.

Ernie Tweedale gone Cul de Sac.
Try a wheelbarrow Ernie it's easier.
Hugo Ballam gone Culbertson.
It's in the cards Hugo.

CC gossiping, Ed grumbling.

Come will be glad to answer your
Radio Questions. Address him in care
of the Chronicle.

General Electric Metal Radiotrons

Unquestionably, one of the out-
standing features of the new radio
sets for 1935-36 is the G. E. metal
radiotron. The new electric sets
have been built around the metal
radio tubes. Their main advantage
is the fact that they will provide
greater stability of performance,
and better operating efficiency dur-
ing the life of the set. These new
tubes are quite small, and are made
of metal. Because of this, the
working parts of the tubes can be
built very close to the base, there-
by shortening the wire leads within
the tube and providing better
control of the high frequency or
short-wave signals. Its metal shell
provides the tube with its own
shield, which also permits better
shielding, since the shell is closer to
the elements. There is still another
important advantage in this self-
shielding tube - the reduction of
space in the receiver ordinarily
needed for the tubes. This permits
placing the tubes in the most ad-
vantageous spot to provide the
best and most stabilized perform-
ance.

The tube is very sturdy inter-
nally and externally. This internal
sturdiness permits stronger sup-
ports for the elements and practi-
cally eliminates any hazard due to
vibration being transmitted to the
tube itself—the cause of these annoy-
ing microphonic noises in the loud-
speaker. The lead wires within the
tube are more widely separated, a
highly desirable feature in radio
reception.

There can be no leakage of air or
gases within these metal tubes, as
they are hermetically "sealed-in-
side" against air and gas forever.

These tubes are not interchange-
able with existing glass tubes, as
their bases differ from that of the
glass type. These metal radiotrons
are designed for universal 8 prong
socket.

We give you a summary of ad-
vantages obtained from metal tube
1. Smaller (internal shield elimi-
nated), approximately half size
glass.
2. More Sturdy.
3. Provide own shielding.
4. Metal shield better heat con-
ductor and radiator than glass.
5. Better performance on short
wave.

6. Greater amplification at high
frequencies.

7. More effective shielding pro-
vides greater stability.

8. Long life vacuum.

9. No "pinch seal" required as in
glass; short direct leads.

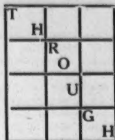

10. Metal can be worked more ac-
curately than glass, clearances
smaller.

11. Space saving permits doing
away with "dual purpose" tubes
made necessary by restricted space
in small receivers. Single function
much more satisfactory.

12. Insulated key-pin easily fits
tube into socket.

13. Less subject to breakage.

Occasional Notes

the Study Window

By Rev. A. D. Currie

After the Holidays, What?

The bell has rung and the chil-
dren have gone back to school. It
is not easy. Their hearts are like-
ly far away on hill and by the
shore for many a day after school
has reopened. Not to the same
extent, perhaps, but in some de-
gree the same is true of the busi-
ness man and the housewife.

Taking things up again? So you
are back at work, say our friends.
Now in this, as in everything else,
our Savior sets us an example.

There was that visit to Jerusalem,
when he was 12 years old. It was
a great hour for Him, and must
have thoroughly impressed him.
Often He had heard His mother
speaking of the Holy City. He
would drink in her words and ask
her many questions. Now at last
He was there, walking the streets
of the city, and entering the por-
tals of the temple. Yet after that
exciting time, we read, that He
went back to Nazareth and was
subject unto His parents. He lent
a hand in the shop, went errands
for His mother, and all the time
He was stirred to the depths with
the memory of His visit to the
Holy City.

So with the help, and in the
spirit of our Saviour, let each one
take up his tasks again in the
home and at the office and in the
church.

Canada's Newest Trains

Keeping thoroughly abreast of
the times, the Canadian Pa-
cific Railway is putting into
commission four semi-stream-
lined lightweight trains which will
operate on the day runs between
Montreal and Quebec, Toronto
and Detroit, and Edmonton and
Calgary. At present these de-
luxe trains are on tour for public
inspection in Ontario, Quebec,
and Western Canada, where they

will be seen by many thousands
of residents.
Economical in operation, and
approximately only half the
weight of a regular standard
train of the same equipment, the
trains, which consist of the Ju-
bi-lee 4-4-4 type locomotive (3500
class) mail and express car, bag-
gage and buffet car and two first
class coaches, mark a distinct

forward movement in modern
transportation in Canada. Thoro-
ughly air-conditioned the cars
at all times are supplied with
clean fresh air and will be found
comfortably warm in winter, and
pleasantly cool in summer. In
the pictures above are shown the
new train, and parts of the first
class coach, buffet car and ladies
lounge.

Annual School Fair Prizewinners for 1936

By "Seedling"

(continued from page one)

Mr. Weather of course will have to take the blame for another large reduction, the gardens were poor, as also was the grain, with poor pastures resulting in thin livestock, so that taking all these things into consideration, we really had a most wonderful display of everything. Perhaps the only thing that marred the day was the boys stealing (there is no other word for it) the candy and cake. However, we can promise them that if they expect to get up these things next year they will have to bring a crow-bar along. A very pleasant touch to the Fair was the display of cut flowers arranged by Mrs. Robt. Arnott. Also deserving of mention was the donation of Mr. Frank Laut, who, having won the pig donated by Mr. Leask, with ticket number 48, gave it back to the Association. The pig was sold by auction to T. M. Mair Esq., adding another \$4.00 to the prize fund.

Space forbids the mention of all of those who helped in their own little way to make your fair a success, so we take this opportunity to express our thanks and appreciation to all who assisted in any way whatever.

JUDGES: School-work, Col. J. A. MacGregor; Cooking and Sewing, Miss L. Milne, O.S.A.; Garden Produce, Grains, Manual Training, Mr. C. Yauk, O.S.A.; Dairy Calves, Pigs and Lambs, G. K. Allonby, Esq.; Beef Calves, Colts and Horsemanship, J. W. Durno Esq. The programme of sports was ably handled by G. Y. McLean and L. H. Graves, and the ice-cream donated by the School-Fair Association and Central Creameries was distributed by the Ladies Aid of the United Church.

VEGETABLES 12 years of age and over

Carrots: 1, Eugene Havens, Sunshine; 2, Eileen May, Greenwood; 3, Lois Longmire, Town (2); 4, Elsie Mossop, Town (2); 5, Gordon Oneil, Oneil.

Beets: 1, Clarence Jones, Oneil; 2, Walter Stewart, Elba; 3, Eileen May; 4, Gordon Oneil; 5, Eileen Arnott, Town, 2.

Parsnips: 1, Lois Longmire; 2, Walter Stewart; 3, Catherine Wylie, Tany Bryn; 4, Laurence McCool, Town; 1, 5, Clarence Johnson West Hope.

Turnips: 1, Eugene Havens; 2, Eileen May; 3, Frances Lennon, Sunshine; 4, Hope Harrison, Glen Rock; 5, Walter Stewart.

Peas: 1, Walter Landmore, Sunshine; 2, Melva Chitwood, Glen Rock; 3, Roy Chitwood; 4, Dale Chitwood; 5, Jean Mitchell, Tany Bryn.

Cabbage: 1, Catherine Wylie; 2, Elaine Belshaw, Town; 2, 3, Frances Lennon; 4, Melva Chitwood; 5, Gordon Oneil.

Under 12 years of age

Carrots: 1, Carl Neilson, Town, 1; 2, Kenneth Brookes, West Hope; 3, Murray Hurt, Town, 1; 4, Mary Taks, Town, 1; 5, Lambert Taks, Town, 1.

Beets: 1, Bessie Reist, West Hope; 2, Neil Good, West Hope; 3, Odell Underhill, Tany Bryn; 4, Murray Hurt; 5, Clarence Johnson.

Turnips: 1, Allan Harrison, Glen Rock; 2, Peter Lambert, Town, 1; 3, Irene Brookes, West Hope; 4, J. Harrison, Town, 2; 5, Odell Underhill.

Cabbage: 1, James Harrison; 2, Odell Underhill; 3, Reggie Belshaw, Town, 2; 4, Kenneth Belshaw; 5, Mary Taks, Town, 1.

OPEN CLASSES

Asters: Margaret Cameron, Town, 3; 2, Eileen Arnott; 3, Melva Chitwood; 4, Eugene Havens; 5, Maxine Mair, Town 2.

Sweet Peas: 1, Eileen Arnott; 2, Gordon Oneil; 3, Margaret Cameron; 4, Margaret Kinniburgh, Glen Rock; 5, Roy Chitwood.

Snappdragons: 1, Ken Belshaw; 2, Eileen Arnott.

White Potatoes: 1, M. Kinniburgh; 2, A. Simpson; 3, G. Butler; 4, J. Kinniburgh; 5, C. Wylie.

Red Potatoes: 1, D. Chitwood; 2, Leon Mason, Tany Bryn; 3, Tom Mason; 4, Jack Kinniburgh; 5, Margaret Kinniburgh.

GRAINS

Sheaf of Wheat: 1, C. Jones; 2, Jack Kinniburgh; 3, Melva Chitwood; 4, Eileen May; 5, Odell Underhill.

Sheaf of Oats: 4th prize, Odell Underhill.

Letters to the Editor

As an act of courtesy "Letters to the Editor" are published, but the Chronicle cannot be held responsible for the opinions expressed

Chicago

September 10, 1936.

Dear Mr. McLean:

I wonder if you would be as kind as to print an expression of appreciation to the Native Sons and Daughters of Crossfield, and to the people of the town and country generally, for the wonderful time they afforded us on the occasion of the chivari.

We are deeply grateful for the gift of the beautiful carving set, and truly Western Welcome and good time.

Very truly yours

Mr. and Mrs. D. P. McFadyen

Crossfield

September 14, 1935

To the Editor

The Chronicle

Sir:

In one of your issues you, as secretary of the Board of Trade, asked for suggestions for the board to use their energies on.

The following suggestions seem to be worthy of their consideration:

1st. As the Government proposes to hard-surface the highway from Calgary to Crossfield next year, which, I imagine, would mean quite a few cars coming to Crossfield for a good drive on a good road.

Don't you think it would be a good thing if the Village Council could find ways and means to hard-surface the two entrances and front of our village. Even when the highway is completed, having good roads into the village might attract tourists into Crossfield.

2nd. Couldn't the School Trustees arrange to have a clinic for eyes and teeth, it seems to me, as an observer, that quite a few of the students need attention in both these very important things.

I think, with the encouragement from the Board of Trade, both the Council and Trustees might do something in these matters.

Thanking you

Yours truly

F. Mossop

A Campaign of Falsehood

The opponents of the present methods of grain marketing are using freely the weapons of abuse and misrepresentation in endeavors to discredit the grain trade, to force their own policies upon the country and to obtain an unfair advantage for the Pools at the country elevator points.

THE FOLLOWING FACTS ARE TRUE:

1. The Western Pools are and have been since their inception, members of the Winnipeg Grain Exchange. They continually use the facilities of the Exchange for the benefit of their customers.

2. When representatives of the grain trade were called upon to give advice to the Dominion Government in 1935 concerning the establishment of a Wheat Board, they appeared publicly before a Parliamentary Committee. On that occasion, as the first witnesses called, they advised the Government to appoint a Wheat Board, to provide a minimum price for the protection of farmers and to use every available channel to market Canadian wheat and to maintain Canada's place in the wheat markets of the world. The representatives of the Western Pools, on the same occasion, demanded the Wheat Board Bill in its original form under which no provision was made for a minimum price but only for the establishment of a compulsory marketing system.

3. The Winnipeg Grain Exchange is one in the chain of the world's grain markets. It is a meeting place for all buyers and sellers of grain. The grain trade has no quarrel with those who think a better method can be found, but up to date no one has discovered a method of marketing that will better serve the interests of the farmer.

4. It is the interest of the grain trade that the farmer should obtain the best possible price for his product and the maximum Government support in the hour of his need. The interest of the grain trade is not thus at variance with that of grain growers; on the contrary, the grain trade realizes keenly that the prosperity of agriculture is essential to the well-being of the Dominion and of all its industries, including their own.

5. No line elevator company, any more than a Pool elevator company, designs to make profit from the fluctuation of grain prices, which are determined by numerous causes that are not and cannot be controlled by the grain trade, the Wheat Board or the Pools.

6. As has been stated before on numerous occasions in the plainest possible terms, the grain trade and the Winnipeg Grain Exchange have made no representations to the Government against the fixing of a high minimum price nor in favour of the dis-establishment of the Wheat Board or the curtailment of its activities.

THE FOLLOWING QUOTED STATEMENTS ARE FALSE:

1. The Western Producer, which is the organ of the Saskatchewan Pool, states in its issue of September 10, 1936, that the Government has decreed the death of the Wheat Board and thereby has complied with the express desire of the grain trade. THIS IS FALSE. The grain trade has expressed no such desire.

2. The same paper, in the same issue, states, "The work of a generation is to be scuttled and if its present intentions are carried out next year, and for many years thereafter, the farmers, if they have a crop, are to be thrown to the wolves of the Grain Exchange." This statement is merely abusive and its implications libellous. If it is intended to mean that the members of the Grain Exchange, which comprises all the elevator companies (including the Pools), the mills and merchants, both foreign and domestic, who compete for the sale of the Western Canadian crop, are organized for the purpose, not of service to the producer but to prejudice his interest this statement is not only false but must be known to be false to the editor and owners of this paper.

3. The following statement is contained in a circular forwarded to various organizations throughout Western Canada by the Saskatchewan Provincial President of the Co-operative Commonwealth Federation: "The Government, by setting the pegged price at 87-1/2c, basis No. 1 Nor. Fort William - 73c to the farmer - has taken money from you and given it to the Grain Exchange." This statement is false and can only be based upon complete ignorance or extreme malice. No line elevator company, any more than any Pool elevator, designs to make any profit from the fluctuations of grain prices. The grain trade challenges the gentleman who made this statement to explain it and to prove it. It is inconceivable that the Western Pools and the elevator companies who have served the producer of Western Canada for so many years, efficiently and honourably, should be willing to continue to belong to an institution which is organized for any such evil purpose.

4. The numerous statements being made through out the country by propagandists that the grain trade is desirous of anything but the welfare of the farmer, or has brought pressure upon the Government with reference to the Wheat Board or the wheat policy of Canada, is untrue.

NOTE: It is understood that a Commission will shortly inquire into the grain marketing system. The grain trade invites those who have made the above statements and similar misrepresentations of fact, to appear before the Commission and support their statements by evidence and argument.

Local Line Elevators

A Quid Pro Quo

If the Dominion government is to open the gates ajar for the admittance of more British migrants to Canada on a colonization basis, it would seem appropriate to suggest that any agreement which may be made should include some provision for the sale of more Canadian produce in the Old Country.

From the viewpoint of Western Canada where new settlers must necessarily engage in a competitive venture with farmers who, in recent years at least, have been forced to offer their wares in narrowing markets, such a proposal would only be a reasonable quid pro quo for accepting new settlers.

It is true that colonization schemes in general and the Hornby scheme in particular, which are now being mooted and are apparently being accorded serious consideration in some quarters, contemplate safeguards to ensure that for at least five years after admittance to the country migrants would not become charges on the administration and that failures would be returned to the country of their origin.

While this may be regarded by some people as satisfactory on the face of it, such safeguards are not sufficient for the protection of thousands of farmers in the prairie provinces who during the past five or six years have not only experienced the greatest difficulty in making a bare livelihood but have had the misfortune to stagger—and are still staggering—under an accumulating burden of indebtedness.

Such colonization schemes, insofar as the west is concerned, have land settlement as their objective which means, of course, that the newcomers will be engaged in the production of agricultural commodities. If they are successful in their efforts the volume of produce offered for sale must necessarily increase with a resultant tendency to reduce returns to all producers of similar commodities.

The only way that this trend can be offset is the creation of new or expansion of existing markets for such produce and the latter might be attained by agreements which will ensure a greater volume of sales of Canadian farm products in the country from which these migrants come. Such agreements, if consummated, coupled with rigid guarantees that the new settlers will be self-supporting, might be expected to at least minimize any indirect loss which the older settlers would sustain as a result of ensuing competition.

New Zealanders, who have been sounded out on the subject of British migration to their country have something of the kind in mind, as evidenced by the report of William Teeling, who recently visited Australia and New Zealand to examine opportunities for British settlement in the two Antipodean countries for, with respect to New Zealand, he is quoted in a recent issue of the London Times as stating:

"From both these Dominions I came away with the impression of young people in young countries convinced of the future of their race, convinced that they had something to interpret from the West to their neighbors in the Far East, and convinced that they still had a lot to do in their own countries before they were ready to admit too many strangers. They seemed, however, quite willing to admit a few under careful and proper auspices."

"It struck me that the best opening was in New Zealand, and that there it could only be achieved through the New Zealand Government (no other large body being sufficiently interested) and by a definite economic bargain for the purchase of New Zealand goods."

Without going into details of the reasons advanced, Mr. Teeling found that prospects for British migration to Australia were practically hopeless at the present time.

Thus it would appear that any British colonization in New Zealand must necessarily be very limited and must be accompanied by an economic pact as a consideration, a suggestion that should certainly be given great weight by Canadian authorities before any agreement is entered into for additional colonization in this country.

Proponents of further colonization in this country have argued that new settlers are consumers as well as producers. This is true, but if they are to be successful they must produce more than they consume, in which event a market must be found for the excess production somewhere. If they do not produce more than they consume, colonization is for them a failure and it would be better for them and the country, if the scheme were abandoned before birth.

Professor Makes Discovery

Finds Green Peppers Contain The Precious Vitamin C

The green peppers that Professor Albert Asant-Gyorgy, Szeged, Hungary, spurned at dinner one night gave him the chief source of precious vitamin C he had sought for a long time.

On that particular evening his wife had revoked her ban on his after-hours work, and he retired to his laboratory to continue his hunt for the anti-scurvy substance.

He took the peppers with him, intending to eat them later. But instead, he subjected them to tests just as he had almost everything else available—and found what he wanted in the vegetables that abound in the neighborhood.

In a few weeks he managed to produce a pound of pure vitamin C from 4,000 pounds of green peppers which, he discovered, have four times the vitamin C content of oranges and lemons, and are cheaper.

Government Cleans Mint

Expects To Recover Large Amount Of Gold Dust

Housecleaning may mean dust and dirt to most people, but it means gold, running to thousands of dollars for the Royal Canadian Mint at Ottawa. When the smelting furnaces at the mint are moved to the new wing, officials of the institution where all Canada's coinage is made and all gold handled, will thoroughly clean the rooms being vacated. According to J. C. Campbell, master of the mint, it is expected that a very large amount of gold will be recovered in the process of cleaning the floors, ceilings and walls.

This reclaimed gold consists of billions of tiny particles which have been carried off by smoke and gases from the huge smelting furnaces and which eventually come to rest on the walls and floors of the rooms.

Manufactures Wind

Full-size aeroplanes can now be fully tested before they are actually flown, in a wind-tunnel at the Royal Aircraft Establishment at Farnborough, England. In this huge apparatus winds up to 115 miles per hour can be manufactured to order.

Wonder House On Exhibit

Everything Electrically Operated In New Type House

Ease and convenience for persons lacking domestic servants and spare time were revealed in a "wonder house," on exhibition at New York. There was an electric range which turned itself off when a roast was done to a crisp, doors that opened without being touched to admit housewives with armfuls of dishes, and illuminated keyholes for husbands arriving home late after lodge meetings.

In the nursery an electric eye set off a series of chimes when anyone approached the baby's cradle, and a burglar alarm buzzed when the window near the cradle was opened, to make it difficult for kidnappers. When closet doors were opened, lights immediately flashed on inside.

An electrically-operated goldfish bowl with floodlights and an underwater air fountain required only one change of water each month.

Another Mystery To Solve

Reason Silica Turns Into Poison When Pulverized

Science has one mystery yet to solve in silicosis, the most dangerous of all dust diseases. The mystery is why silica, the dust responsible, turns into a poison when ground to particles the size of bacteria. The surprising behavior of silica was explained at the Harvard tercentenary by Dr. W. Irving Clark and Prof. Philip Drinker at the Harvard school of public health.

Beach sand is almost pure silica. Silica is part of the beauty of opals and occurs in quartz, flint, sandstone, Jasper and many other common substances. In all of them it is harmless to human beings.

When ground fine enough to fly in the air particles of silica cause a distinct, new lung disease.

Trees breathe through tiny openings on the under side of their leaves. A single apple leaf has more than 1,400 of these pores.

Our idea of the usefulness of things is for a motorcycle policeman to stop a motorcar driver for making too much noise. 2161

WAKE UP YOUR LIVER BILE

And You'll Jump Out of Bed in the Morning Ready to Go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas builds up your stomach. You get constipated. Bile enters your system. You feel sick, weak and the world looks dark.

A more powerful movement doesn't follow as the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get those two pounds of bile flowing freely and make you feel, like old Mr. Harkness and people they met, like Carter's Little Liver Pills. The work of a colonist has no colored or mercury in it. Ask for Carter's Little Liver Pills by name! It usually refuses anything else, 25c.

Used To Motor Cars

Reason So Many People Have Never Ridden On Trains

Every once in a while nowadays—much more frequently than in the past—stories appear in the newspapers about passenger trains, the service they give and the people who ride on them. And in some of these stories the fact is mentioned that many people are riding on trains for the first time in their lives.

These people aren't from any backwoods region, either, where a train would be something of a curiosity. They are from towns and cities, and in the course of their lives have frequently watched trains go by, possibly gone to the station to welcome friends. But they have never been passengers themselves, and the reason is that they're young people, born since the day the motor car displaced the train as the chief means of travel.

People who have never ridden on trains are not common in Port Erie. There are too many railroad people here, and railroad men and their families get passed when they want to travel. But in other towns where railroads aren't a leading industry, it is not an uncommon thing to find many of the younger generation who have done all their travelling by car or bus.

Now, however, train travel is becoming popular again and the next generation may be more train-conscious. The railroads are responsible for a great deal of interest in their trains. In the last two or three years they have publicized their streamlined, made much of their improved service, and worked hard to eliminate the stigma of unconcern maintained toward the public by the railroads a few years ago.—Port Erie Times-Review.

Asks Farmers To Co-operate

Eastern Cattle Men Urged To Aid Feeder Plan

Hon. J. G. Gardiner, minister of agriculture, made an appeal for the co-operation of farmers of eastern Canada in the government's efforts to aid cattle breeders in the drought areas of the prairie provinces. He was addressing the livestock exhibitors at the Central Canada exhibition in Ottawa.

"I am told that here in the eastern area, between this district and the maritimes there is an abundance of roughage food," Mr. Gardiner said. "That is why we are hopeful of the success of our plan. But this plan will not be for the benefit of the western farmers alone, while it is true that we are offering to pay the fares of those who go west to buy feeder cattle."

"And if these cattle after being brought east are fed for three months, the government will refund half the freight paid to bring them here. There is a direct benefit to come for those who do take the cattle for feeding."

Japan's Low Labor Cost

Enables Them To Undersell Other Countries' Home Products

The St. Catharines, Ontario, Standard says a copy of the Knit Goods Weekly, U.S.A., received in their office, contains an article which shows that cotton hosiery from Japan is making tremendous headway in the market to the South. It is shown that if the tariff were raised fifty per cent to what it is now, Japan could undersell the home product by 18.6 per cent, all due to the low labor costs of the Japanese. Male hosiery knitters in Japan earn \$2.90 a week and female \$1.25. That is the story behind the industrialization and world market drive of the Japanese manufacturers.

A Scot entered the shop where he had recently bought a bicycle. "It's about the bike, mon," he said. "Hasn't it arrived yet?" said the shopkeeper.

"It has," said Jack, "but where's that free wheel?"

Apriots, peaches, pomegranates, and oranges were referred to by the ancient Romans as "apples." They distinguished the fruits by the names of the countries where they were grown.

Not Very Long Ago

Bathing Had By-Law Forbidding

Cleanly Anglo-Batons on both sides of the Atlantic have been shocked at the revelation, by an American plumber who has just returned from a European tour, that though the Hohenzollern Palace at Potsdam contains 600 baths, there are only two bath-rooms in it. And the plumber found, also in Germany, a castle of 260 rooms which had no bath-room at all.

But there was a time when the Boston city fathers passed a by-law forbidding anyone to have a bath except by doctor's orders, and this was not repealed till 1862. Again, just over 100 years ago, when the Lord Mayor of London asked for a shower bath to be installed at the Mansion House the request was refused, as "the need of same has not been heretofore complained of."—London Answers.

Building Without Stairs

Will Have Ramps So Car Can Park On Any Floor

Hotels and offices in which cars can drive to any floor and houses with more than one floor, but no stairs, are being designed in London. The buildings will have ramps, like those in some large garages. The young designers claim that their plan will do away with traffic congestion, make it possible for dwellers to drive their own cars into the building and park them outside their doors, make roofs into car parks, and provide overhead roads. The inventor is an architect, Dr. M. Hoeny. Already buildings on his principle are being put up in Leeds, England and in France. The Leeds building will contain a 150 bedroom hotel, a 170 car garage in the basement and a motion picture theatre. Cars can be driven right into the building, ascending to any floor.

Little Animal Has Courage

Man Tells How Gopher Rescued His Helpless Mate

The gopher, unassuming and somewhat ratty animal, attains heights of courage that merit him a better name, says A. D. Bain, superintendent of a chain of bungalow camps in the Canadian Rockies.

On a recent inspection trip, Bain saw as he approached in his car an injured gopher lying helplessly in the middle of the road. Nearby stood another of the little animals, bristling and showing his teeth, although obviously frightened.

When Bain stopped the car, the second gopher put his head into the scruff of his dying mate and dragged her to the safety of the long grass beside the mountain road.

Lightning Kills Birds

Found Underneath Large Tree Which Was Not Struck

Included among the freaks of the severe lightning storm which struck Raleigh, North Carolina, was the electrocution of between fifty and sixty sparrows roosting in a tree which was not struck by lightning. The sparrows were found underneath the large tree. Since the tree was not struck it is believed the heavily charged air, coupled with the current given off by electric wires in the vicinity, resulted in the electrocution.

Gives Excellent Results

Excellent results from blood-testing poultry flocks are reported from all parts of Canada. A breeder in British Columbia who had his flock blood-tested last fall at a cost of \$16 sold hatchery eggs for the value of \$608 to one of the commercial hatcheries. At a sale of Record of Performance certified stock by an Ontario breeder to a breeder in the United States, R.O.P. certified females sold for \$5 each and an R.O.P. male for \$15.

"The Object of his Affections"

You said it—Ogden's Fine Cut Men who roll their own cigarettes have a yen for Ogden's, because Ogden's does roll a cooler, sweeter, smoother smoke. If you're not already acquainted with Ogden's, take a little tip—try this mellow, fragrant cigarette tobacco. Yes, sir, you'll like Ogden's Fine Cut and you'll like the way it's packaged, too—Cellophane-wrapped with the purple easy-opening ribbon. Be sure to choose the better papers—"Chanticleer" or "Vogue".

OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug

SELECTED RECIPES

PUMPKIN PIE

- 1 1/2 cups pumpkin
- 1 dessertspoon flour
- 1 cup sugar
- 1 teaspoon ginger
- 1 teaspoon cinnamon
- 1/4 teaspoon nutmeg
- 1/2 teaspoon mace
- 1/2 teaspoon salt
- 3 eggs
- 1/2 cup milk

Mix pumpkin, flour, sugar, spices and salt together; beat eggs, add milk and stir all well together. Pour into a deep pie plate lined with good pastry. Bake until firm (about 35 minutes) in a moderate oven.

Just Recently Known

Twenty-five per cent of the vegetables and fruits people eat were unknown even ten years ago. They come from strains of plants that didn't exist a decade past. Cantaloupes, for instance, a popular item on many tables. A few years ago it was scarcely possible to produce them because they were afflicted by a mildew. A scientist discovered a species in India that resisted mildew and, by cross breeding, made the plants of this continent.

After 400 years, one of the best-known "ports of call" along London's waterway, The Turk's Head Inn, Wapping, has been closed.

Hundreds Of Suggestions

Lord Mayor Of London Receives Ideas For Memorial

Several hundred suggestions for a King George Memorial have been received by the Lord Mayor of London and he and the King George Memorial Fund is considering them. Among them are renaming Trafalgar Square, King George Square, removing Nelson's Column and the Lion to Tower Hill, erecting statues of King George and his four sons, and placing the Cenotaph in the centre of the square are some. A flood-lit Mausoleum in Hyde Park is another. The erection of a colossal flood-lit statue on the cliffs of England, near Leven-Solent, similar to the Statue of Liberty in New York, visible at sea for 20 miles, is still another.

Has Supply Fingers

Leo M. Stensler, of Waiters' Union, No. 16, of New York City, by the genius of his supply fingers, can produce, at a moment's notice, from a plain table napkin a bishop's mitre, a wedding candle, a sailboat or a clown grinning under a fool's cap. He demonstrated his prowess recently before a meeting of the Hotel and Restaurant International Alliance in Rochester, N.Y.

According to a correspondent of Collier's, an undesirable alien is a foreigner who makes more money than he does.

TOTAL	\$1,450.00

IN CASH PRIZES

FOR THE BEST SLOGANS FOR ROYAL HOUSEHOLD FLOUR

This is What You Do

Merely write a slogan of not more than ten words relating to Royal Household Flour and good enough to describe this favourite brand. It's easy to do. Here are a few examples: "Best by Triple Test", "Made by the Master Miller" or "A Guarantee of Uniform Baking Results". You may send in as many slogans as you wish, providing you follow the simple rules below.

YOU MAY WIN A VALUABLE PRIZE

We want a slogan for Ogilvie Royal Household Flour and for the best ones submitted during this contest will award prizes as outlined above. Read the simple contest rules and send in your entry. You may win a valuable cash prize.

There's a treat in store also for you if you've never tried this popular brand of flour—Royal Household. It is a flour of the first quality—good for bread, cakes and pastry. It's triple-tested—tested for wheat quality before milling, tested for flour quality during milling and tested for baking quality after milling, *all before you buy*. Get a bag today.

216 PRIZES TO BE AWARDED!

Here Are the Simple Rules:

1 Use a plain sheet of paper and write out your slogan. Write your name and address clearly at the bottom and on the other side of the sheet write the name and address of the store where you purchase your Royal Household Flour.

2 You may submit as many slogans as you desire, but with each one send the words "Royal Household" cut from the small label in every bag of Royal Household Flour. Or you may send in a reasonably accurate facsimile of same.

3 This contest will close on November 30th, 1936. All entries must be postmarked not later than that date.

4 Mail your slogans to "The \$1450 Prize Contest, The Ogilvie Flour Mills Co. Limited, Winnipeg, Canada."

5 Contest is open to all residents of Canada except the employees of The Ogilvie Flour Mills Co. Limited and their families.

6 In case of a tie the prize money will be equally divided. The committee of judges is composed of three independent, disinterested persons in no way connected with The Ogilvie Flour Mills Company Limited and their decisions will be final. No correspondence will be entered into and all slogans submitted will become the property of The Ogilvie Flour Mills Co. Limited.

RETAILERS

You share in this, too. The retailers named by the first six prize winners will each receive \$25.00 cash.

Question Is Settled

Scientists Come To Conclusion Animals Have No Souls

Scientists working with delicate apparatus in a Kensington laboratory have settled a question that has caused endless controversy in every part of the world.

Have animals souls?

Do our pets survive after death?

Dr. Nandor Fodor, an internationally-known psychical research expert, asked Mr. B. J. Hopper, M. Sc., one of the most brilliant of British physicists, to begin experiments that would answer the question.

Now, after experimenting on mice, birds, frogs and cockroaches, both scientists issue this statement:

There is no evidence that animals have souls or any existence after death.

Argument on the subject suddenly increased when Dr. R. A. Watters, director of the Dr. William Bernhard Johnston Foundation for Psychological Research at Reno, Nevada, started the world with his claim two years ago:

That he had photographed "souls" leaving the bodies of animals killed in a specially-constructed chamber.

His photographs, he said, showed the shadowy "souls" of animals which resembled the physical bodies in shape.

Dr. Nandor Fodor started experiments at the International Institute for Physical Research, Kensington.

"The results," Dr. Nandor Fodor told the Sunday Chronicle recently, "were disappointing. We were unable, despite the most thorough examination, to confirm the American claims which had been hailed by Spiritualists as proof of the existence of survival."

Extending London's Tubes

Whole System Is Planned By Sur-

veys Above Ground
A \$75,000,000 project—the extension of the Central London Underground railway from Liverpool Street to Stratford, Leyton and Newbury—has just been started. Another \$1,250,000 is to be spent on straightening and enlarging the existing Central London line which was completed in 1900.

A new underground tunnel is usually built in mile-long sections, and so accurate do the big tunnel-builders work today that when these sections meet there is never more than a fraction of an inch difference between them.

This is because the whole system is planned out above ground. Working at night, the surveyors mark out the route in the streets, with all the necessary twists and turns.

Shafts are sunk at various points and by using a theodolite the engineers detect before an strike the exact direction of the lines marked out on the surface.

A great circular shield is used in driving the new tunnel. It has a sharp edge, and is forced along by hydraulic rams. As it moves, men take away the earth through doors in the head of the shield, and the newly cut tunnel is encased in cast-iron rings.

If the tunnel has to go through areas where underground rivers or streams are likely to cause trouble, the work is carried out in compressed air, which keeps the water back.

Compliment For Canada

Has Made Best Progress In Solving

Great Shoppers Problem

Canada was paid a compliment at the Fourth International Conference on Anti-Locust Research, held at Cairo, Egypt. The conference considered that the formation of the Canadian Committee on Grasshopper Research and its close co-operation with workers in the United States was the type of organization required. It was also shown that the work in Canada has progressed nearer to a solution of the grasshopper problem than in any of the 24 countries which sent delegates to the Conference.

Left Brief Will

The fate of \$5,400,000 was decided by six lines of writing in Melbourne, Australia. The money was the fortune of Mr. Benjamin Nathan, senior partner in a furniture warehouse firm. His will, a six-line document, has now been proved. It divides the money between his two married daughters.

Hurricanes which blow at a rate of 80 miles an hour exert a pressure of 32 pounds a square foot.

MECCA PILE REMEDIES

Thou Shalt Not Love

— A NOVEL BY —

GEORGIA GRAIG

CHAPTER V.—Continued

I told myself then that if I saw you again that it would be a sign to me that at last I had found the girl I wanted. Heaven knows I've turned the town upside down looking for somebody who could look the part, as well as act it. When I saw you again tonight—well, you know what I said—Three times and out! I guess you didn't understand. I leaned over and looked her straight in the eyes. "I don't know who you are, nor anything about you, except for the essential things I asked you. I don't want to know anything else. The past is gone. Your life begins this minute."

"You want to play—to be envied, loved. . . I'll make you the talk of the town—a better press agent job than any movie actress ever heard of. It's a natural. You'll start out with an advantage no siren in history ever had. Your reputation is already made for you! All you'll have to do is live up to it! It won't be with a Broadway background, either. It will be among the 'best people' in town, those with whom you'll mingle, on whom you'll cast your spell. Your every wish shall be realized. You are beautiful—which of course you know. I'll provide the clothes and all the stage scenery. Every woman in town will be envious of you; every man will want to make love to you. Play up to it. Play!"

He paused to let his words sink in. To Starr it was still all part of that unreal dream she was sure was not yet finished. But he looked real enough. His voice was no figment of her imagination, his earnestness sincere. He pressed his advantage, seeing her quiescence.

RHEUMATISM

—often results from clogged and inflamed kidneys allowing acid toxins to get into your blood. Take GIN PILLS to drive out these pain-causing impurities and soothe and strengthen your kidneys.

"All I ask is that you keep your name in the headlines—not of course with any remotest connection of a Starr Ellison that was. That girl's dead from this minute on—dead and buried. A poor one, the famous, or infamous author, has arisen in her place." He could not, or would not, see the stricken look in Starr's eyes as he made his emphasis, nor could he know of the choke in her throat that kept her from crying out. "Dead and buried"—he had said. . . He was interested only in his own scheming. "Starr Ellison, the author, must be kept on the front page, if possible, right from the go-off. I don't care how. It won't matter. What will be of account will be that every mention you get will increase the sales of the book. You'll make a fortune for me—and I will pay you accordingly."

He stopped and studied her a moment more, nodded his satisfaction. "Yes, you look the type all right—knew it from the start—with those mysterious eyes of yours and all. . . We'll have to cook up some kind of story—you gave me an idea with those few words of Arab gab of yours—a small matter—leave all that to me. The important thing is that you grasp my plan. If you haven't by any chance read the book I'll tell you that my 'Play-Girl' is a symbol of blatant sex appeal, beauty without emotion, without a soul! Do you understand? Do you think you can live the part?"

Could she? Dared she try? Oh, yes, she understood, and the understanding was rather staggering. The bold, devil-may-care, social-climbing Michael Fairbourne was ashamed of the book he had authored. He wanted to hide behind the skirts of a woman—so that his precious royalties could go on!

Starr was to help him make a fortune so that he could marry the proud Stephanie. She was to sacrifice her own personality—he didn't care the flick of a wrist about that; he had said so in no unmistakable terms. She was to quit being the Starr Ellison she had known for almost twenty-three years and allow herself to evolve into a glamorous fiction character, a creation of the brilliant mind of Michael Fairbourne! Who was ashamed of it.

She flung up her head proudly, in the gesture her father had so often likened to the disdainful hauteur of his beloved ancient Egyptian princess. She wanted to tell him—so many things. Then she wilted. The realization of everything came back to her: things she had forgotten; the six months of life—Fut-Amer-Ru—Anna-Sun. . .

Michael Fairbourne wanted her to do this thing. Well, why not? Six months of life, after all, were all she had left. She would have no future in which to harbor any lingering regrets. She had rallied against the fate which condemned her to be a

drab, falling star. This man was giving her the chance to flash through those last six months, a flaming meteor. It could be Fate—an answer to her defiance of the Egyptian gods and their curses. To do as he asked meant that she could drink deep of the gay wine of life. In her few months she could crowd in a lifetime of thrills. Defy grim destiny in a reckless round of pleasure. Surely she had the right to do that, she who was doomed?

A strange excitement possessed her suddenly. Her cameo features glowed. She said, impulsively: "I can do it!" Michael's hand came across the table. A big warm hand clasping her cold small one to seal their bargain. She lifted her lashes to look at him out of her long, mysterious eyes. It didn't seem just exactly right. She must make some protest. After all, if they were to be so intimately associated, would it not be better if she confessed to him—a few things. She said softly:

"But after all, we're strangers. . . Why should we trust one another—so far? You know nothing of me. . ."

He flung up his head, smiled enigmatically, but the hardness in his tone was not so noticeable.

"I thought we'd passed that. But what, does it matter? Strangers. . . Yes, perhaps. But do any of us ever truly know each other? Even after we've lived in close companionship all our lives? Aren't we lonely souls—all of us? Strangers?" The one brief glimpse he allowed her into his inner mind passed instantly. Once again he was the coldly calculating business man. He mentioned then, as though it were an afterthought:

"It's only fair to tell you that the job won't last forever. It may not last long at all. That's rather up to you—and to me, I suppose, as your manager-press agent. Public fancy is fickle. You will be 'Play-Girl' only as long as people are interested in the book. It may possibly be but a few months. Then you will have to go back—wherever you came from."

A dagger of ice stabbed at Starr's heart. Her great black eyes assumed that suggestive air of looking upon things remote and unearthly, which was part of her greatest beauty.

One thing that helps is to wear a dish, pour in Minard's Liniment gently in.
Pain eases off!

MINARD'S LINIMENT
"KING OF PAIN"

She murmured as though to herself: "A few months will be—enough."

CHAPTER VI

"We've got to have a background for you," Michael had said, not in the least interested that Starr might have a perfectly good one, ready-made. And so he proceeded to furnish her with one which would have made an excellent plot for some other book he might some day write. Which suited Starr excellently. In this new role she didn't want to be reminded of the Starr Ellison of tragic days, nor would she have cared to be identified back in her New England home town with the Starr Ellison who was the notorious "Play-Girl."

She entered into all Michael's schemes enthusiastically, surprised at herself that she no longer shrank from all his talk about Egypt and Egyptian things. Her communion with the priestess on a vase in the Museum had done that. In fact, she rather welcomed the idea of having Egypt recalled in every way, much as a wound can be temporarily eased by the anaesthesia of further wounding.

It was Michael's idea of my she had come from Cairo. There was to be considerable mystery about just who she was, but he would see to it that there were rumors spread of her being the daughter of an American soldier of fortune and an Egyptian mother whose ancient and distinguished ancestry could be traced back to princesses of Cleopatra's day.

"You see," Michael explained, "it would all work out splendidly—with those eyes of yours and your mysterious air, to say nothing of those few words of Arabic you've picked up, though God knows where. Besides Cairo's so far away no one can investigate and find out anything at all. . ."

(To Be Continued)

At Vinny Ridge

The London Sunday Express says when the Canadians came first to France, khaki-clad, and many of them with the speech of France on their lips, French people felt almost that another France had leaped to their aid. "Now the Canadians, who stood under the noble memorial on Vinny Ridge, realize that there is another Canada on the soil of France, but Canadian for ever by the purchase of blood and courage."

"I have a talk with my husband about money at least once a week." "Oh, mine's paid just once a month."

Wild tribesmen of Ceylon shoot from a sitting posture, and hold the bow with their toes and feet.

More than 32,000 women work in India's mines.

Little Helps For This Week

I made haste, and delayed not to keep Thy commandments. Psalm 119:60.

Never delay To do the duty which the hour brings. Whether it be in great or smaller things; For who shall do the coming day?

It is quite impossible that an idle floating spirit can ever look up with clear eyes to God, spreading its miserable anarchy before the symmetry of the creative mind. In the midst of a disorderly being that has neither centre or circumference, kneeling before the glorious sky that everywhere has both, and for a life that is all failure turning to the Lord of the silent stars, of whose thought it is that "not one faltering" The heavens with their everlasting faithfulness look down on no sadder contradiction than the sluggish and careless in their prayers.

Collected Rare Alpine Plants

Naturalists Return To Victoria After 3,000-Mile Trip

After collecting 20,000 rare alpine plants, Ed. and Joe Lohbrunner, Victoria naturalists, came back to civilization after a 3,000-mile trip on the fringe of the Arctic.

"It's difficult to say what a rare plant is," Joe Lohbrunner said. "Where we were these plants are plentiful but they are rare down here."

On the Ogilvie range on the border of Alaska and the Yukon Territory the Lohbrunners waded through Rhododendrons—millions of them as far as the eye could see. There they found what they believe to be new species of ferns.

On their return trip the brothers arrived at Valdez, Alaska, and tried to book passages on the boat but found the ship was full. The next two boats were also booked up.

"We had to get out of the country somehow," Joe Lohbrunner said, "so we stowed away."

The expedition was financed by prominent British and United States naturalists.

Flower From The Tropics

Giant Arum Lily Attracts Crowds To Holland Hothouse

A giant arum lily, eight feet high and three and a half feet across is attracting crowds to the hothouse of the Agricultural High School at Wageningen, in Holland. It is growing from a bulb that weighs six stone four pounds. The lily, which is from the tropics, seldom blossoms.

The flower lasts only two days. It blossomed the first time in July, 1932, and is the only specimen in Europe.

R. D. Sutherland was confined to his house Wednesday. Bob has been feeling kind of under the weather lately.

School opening is relieved of many of its worries when fish is a regular item of the family menu. See the Crossfield Meat Market today, they have fresh shipments weekly.

Mr. and Mrs. T. B. Smeaton are holding an Auction Sale on Friday September 25th, prior to leaving for England. A. Boyce, Auctioneer. No definite plans are made, but they will stop at Nottingham on their arrival. The best of wishes go out to them at this time, and they will be greatly missed in their Church and Community.

Mrs. G. Y. McLean left Thursday to spend a few days with her brother A. B. Evenson, at Banff Alta.

DOG POUND NOTES
From Our Own Correspondent.

Mr. and Mrs. Harvey Braun, of Long Beach, California, Mr. and Mrs. J. H. Braun, and Miss Pearl Braun of Annis, B. C. were visitors at Mr. and Mrs. Henry Hoffman's of Dog Pound, on Friday and Saturday.

The men of the Dog Pound district spent a few days last week, working on the new Hall.

Protest Minimum Wheat Price

(From Calgary Herald, Sept. 1st)
Directors of the Alberta Wheat Pool, meeting in Calgary for their regular monthly session, passed a resolution protesting against the fixed minimum and also the enactment which prevents the wheat board accepting deliveries until the price level goes below 90 cents a bushel.

In the words of the resolution the ruling "was considered tantamount to ordering withdrawal of the wheat board from fulfilling the function for which it was formed."

The Pool board expressed the opinion that the federal government in its action failed to consider wheat at world levels and return to the growers in Canada a price commensurate with the cost of production.

"What the government's move virtually amounts to," the Pool directors stated, "is an order to the western wheat growers to accept financial rewards for their labour based on world levels. What other class in Canada, outside primary producers, are thus treated?"

"We feel that the policy of the government is reactionary and that the interests of the wheat growers are not receiving the consideration they are entitled to, particularly in view of the considerate treatment given to wheat growers by the governments of virtually every other important wheat growing country in the world."

"The Pools obtained a wheat board after a long struggle and view its forthcoming disintegration with alarm and regret. The world wheat problem is not solved by any means and Canada needs an active and aggressive wheat board."

W. K. Gish was an Edmonton visitor last weekend.

Mrs. (Dr.) Whillans was a patient in Calgary last week, having undergone a tonsils operation.

R. L. Johnstone of Lap Wal, Idaho, visited in the district last week.

William Sihvon of East Coulee, was a business visitor in town last week.

William Urquhart left for Vancouver Saturday, to spend a well earned vacation.

Mrs. Bishop of Calgary, and sister of William Urquhart, left for Vancouver Friday, September 11.

Mrs. Ed Clarke and family, of Calgary, were week end visitors in Crossfield.

A PRODUCT OF LEYER BROTHERS LIMITED

A Matter of Principle

If grain growers do not fight for their own interests, who will aid them?

The Alberta Wheat Pool is continually striving to improve the lot of the grain growers.

Better protection and better prices is the objective sought.

The Pool is the only grain handling organization keeping up the battle. It fights alone, among commercial concerns, for a living wage for grain growers.

The grain growers can most effectively help by delivering their grain to

Alberta Pool Elevators
